

ELEMENTAL AIR

Innovative Technology for Air Quality Management

SERVICES AVAILABLE

Testing, Consulting, Engineering,
Custom Software, Audits

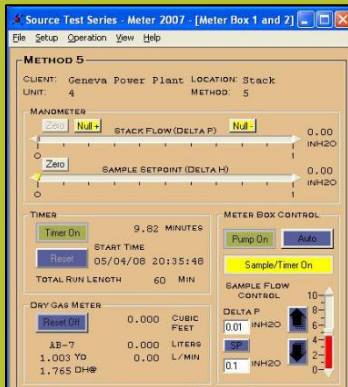

- **CLOUD-BASED SOFTWARE (MAPS)**

Highly secure environmental management software system provides multi-user access to real-time environmental data

- **MULTI-LOCATION SAMPLING**

Wireless network of automated consoles allows for complex, large-scale research and performance projects

WHY CHOOSE ELEMENTAL AIR?

- Over 20 years of Air Testing and Consulting Experience
- Innovative Equipment and Technology Designs Provide Instant On-site Results and Faster Reporting
- Highly-Precise, All-Digital Data Collection
- QSTI Certified Individuals - AETB Compliant Company

WHAT SETS US APART?

We pride ourselves on uniquely designed testing equipment that increase accuracy and efficiency as emission limits continue to become more restrictive. Advanced technology is the basis by which Elemental Air conducts business. With skilled software and equipment design capabilities, our mission is to provide customized products and services to best match our clients' needs.

Elemental Air provides fully automated, continuous, digital measurements for a wide host of emission methods such as EPA, CARB, SCAQMD, Solid Waste, ASTM, and NIOSH for engineering and compliance purposes. Our trained staff includes QSTI certified project managers that meet the requirements for Part 75 emission testing.

"Great results, good value, high integrity."

-Mike Bruggeman, Environmental Compliance Supervisor
